Optical LAN Base Software FlexSym OLT-mini

Tellabs Optical LAN Series takes a tiered software approach that optimizes pricing that matches the exact requirements of market and customer. The tiered software starts with Base System Software and then builds value with additional Optional Advanced Software options. Base Software provides fundamental operations for OLTs, ONTs, and the PON Manager.

Features

- Satisfy the most common and compact enterprise local area network requirements
- Economical fiber based access solution serving the data needs of guests at hotels or resorts, tenants at senior living, student housing, apartments, condos and all forms of multi-dwelling units
- Basic enterprise voice, video and data across both wired and wireless; via smart phone, tablet, laptop and desktop computer

Highlights

Smart

Industry leading ROI and TCO are enjoyed with lower day-1 capital costs and year-over-year operational costs.

Simple

Easy network management and control across the LAN. The Tellabs Base Software is the brain that supports a less complex LAN.

Scalable

As the network grows add Tellabs Advanced Availability Software Package, Tellabs Advanced Operations Software Package, Tellabs Advanced Security Software Package and Tellabs Advanced Network Access Control Software Package as needed.
